

DMR BCS 732/722 Trencher

DMR offers many cutting blade options to pair with your trencher. This allows you the flexibility to install in the toughest of ground or in a manicured lawn with professionalism and ease. All of our cutting blades are custom made from high nickel, high carbon alloy tool steel. Our blades will outlast any of our competitors who use anti-abrasion steel; which is much softer and less durable.

We are excited to introduce to you our partnership with BCS America. BCS tractors are owned by 1.5 million people worldwide. Powered by a reliable Honda engine & custom manufactured for your trenching needs by DMR. DMR is the original wire trencher manufacturer for the pet fencing industry since 1990. Installers will enjoy the dependability of the Honda engine combined with the intuitive design of the DMR/BCS Trencher. At the heart of the BCS is the all gear driven and automotive-style clutch. This means less maintenance and costly repairs (no belts or chains to replace or adjust)! This will save you time and money letting you do what you do best; install fences. Weighing in at approx 300# it's heavy duty and easily transported at the same time. Handle bar height adjustment allows for compact stow away or comfort during operation. DMR/BCS Trenchers offer the flexibility of 180 degree reversible handle bars that allow you to get into smaller spaces and safely navigate hills and tough terrain. DMR and BCS together provide proven performance, durability and versatility at a reasonable cost to you.

Custom Trenchers
Since 1990
